

Copy number :

13

تعليمات الزامية : كتابة البرنامج كاملاً داخل main | استعمال حلقة واحدة فقط | يمنع استعمال المصفوفات، الدوال، break / continue

Input reading:3pts | Initialization:3 pts | Loop condition: 4 pts | Counters logic: 4 pts | Stop conditions: 3 | Final output:3

```
#include<stdio.h>
int main(){
int N,A,S;
int X;
printf("enter the number of attended session");
scanf("%d",&X);
if(X<A){
    printf("absent student");
}
else{
    printf("present student");
}
```

Copy 13

```
#include <stdio.h>
int main ( )
{
    int N, A, S ;
    int X ;
    Printf ( " enter the number of attended session " ) ;
    Scanf ( " %d " , & X ) ;
    if ( X <A )
    {
        Printf ( " absent student " ) ;
    }

    else
    {
        Print ( " present student " ) ;
    }
}
```

COPY NUMBER: 13

Analyse :

Algorithmique :

- Pas de boucle. Traitement d'un seul cas.

NOTE FINALE : 03 / 20

Feedback :

- **Appréciation globale : Insuffisant.** Incomplet.
