```c
# include < stdio.h>

int main ( ) {
int N, A, S, X;
int n, P, a;
int i=1, counter1=0, counter2=0;
printf (" Enter N:  /n");
scanf ("%d", &N );
While |(i <= N) || (a=S)) {
        i==n
printf (" student number n: "n);
printf ( " Enter X, A ");
scanf ( "%d %d ", && X, A );
if ( X < A) {
    printf ("session canecelled");
    Counter2 += i;
        i++;  counter2 == a;
printf (" absent students :"a );  }
else  X > A {
printf (" session valid ");
counter1 += i;
    i ++;  counter1 == P;
printf ("present students :"P );  }

    }

return 0; }
```

Copy 12

```c
#include <stdio.h>
int main()
{
    int N, A, S, X;
    int n, p, a;
    int i = 1, counter1 = 0, counter2 = 0;
    printf("Enter N: \n");
    scanf("%d", &N);
    while (i <= N || a == S)
    {
        i == n;
        printf("student number n: %d", n);
        printf("Enter X, A");
        scanf("%d %d", &X, &A);
        if (X <A)
        {
            printf("session cancelled");
            counter2 += i;
            i++;
            counter2 == a;
            printf("absent students: %d", a);
        }

        else if (X> A)
        {
            printf("session valid");
            counter1 += i;
            i++;
            counter1 == p;
            printf("present students: %d", p);
        }

    }

    return 0;
}
```

Analyse :

Algorithmique :

- `while (i <= N || a == S).` (|| continue si a == S).
- Comparaisons pseudo-code `counter1 == p`. (Comparaison sans effet).
- Incrémentation `counter2 += i`. Ajoute l'indice étudiant ??
- Confus.

NOTE FINALE : 07 / 20

Feedback :

- **Appréciation globale** : **Insuffisant**.
